ABOUT THE ARCHIVE

Community and Identity in North America is a twentieth century collection that offers perspectives on society, sexual identity, community building, and gender issues. This archive focuses on North America, with collections from Canada, the United States, and Mexico. It presents social history that casts a spotlight on diversity, equity, and inclusion with materials that cover activism and social justice issues.

It also highlights disabilities in Queer society, offers information around alternative sexualities, documents interactions between sexuality and religion, and represents diverse ethnic communities across North America. These LGBTQ history collections detail how identities developed in different social conditions, and how communities grew around dedicated, sometimes courageous, individuals.

The materials are mainly unique and unpublished personal papers, providing a more individualised historical perspective instead of focusing on organisational papers and large periodical collections. This collection represents the diversity of individuals within various North American communities, helping researchers get to know the people involved and their experiences.

COLLECTIONS INCLUDED
